HTML5, CSS, and JavaScript. Flexbox, Bootstrap, and Material UI. ReactJS and ES6. NodeJS and Express. MongoDB, MySQL, and Google Firebase. Git, NPM, and Github. Stripe Payments.

Projects

Those Guys Appliance Repair — *Website/SEO*

August 2018 - Current

I reworked their web presence from the ground up. A redesigned website, keywords in social media post, and maintaining consistency across the web has allowed us to reach the #1 or #2 spot in google search results

https://www.thoseguysappliancerepair.com

All In Inventory Management — *Website/Database*

August 2019 - Current

All In Vapes and General Store is a small store in Duncan Falls, Ohio. The store does not have internet access and was keeping track of all inventory/sales with paper. The system handles logins and user creation, the ability to track inventory and sales, and generates reports for items sold/profits.
